## **BIOLOGICS & ASTHMA**

Roughly **25 million Americans** 

have asthma.

## BIOLOGICS HAVE SHOWN TO BE EFFECTIVE

in treating patients with severe asthma by:

- Decreasing the frequency of hospitalization
- Minimizing the need for oral corticosteroids
- Reducing symptoms and the need for other controller medication
- Improving lung function

## 2.5 MILLION AMERICANS

have severe, uncontrolled asthma

There are

6 FDAAPPROVED
BIOLOGICS
FOR TREATING
ASTHMA.

In December 2021, tezepelumab became the most recently approved.

ONLY ABOUT 1/3

of severe asthma patients visited an allergy/ immunology specialist in the past two years.
